Get More with proprietary Dual-Extraction Technology

By pairing hot-water extraction with an innovative fermentation-based process, we unlock exceptionally high concentrations of key actives in a form the body can readily absorb compared to standard dried and powdered mushroom. The result is a potent extract with a clean, smooth, neutral taste.

Always Full-Spectrum

At Monterey Nutra we simultaneously maximize the concentration and bioavailability of total active compounds in every extraction. This is possible by combining both the mushroom fruiting body and mushroom's mycelium, capturing the nutraceutical benefits of the complete mushroom lifecycle.
